Teste de mann-whitney one-tailed, com nível de significância 95%.

Hipótese nula: as amostras obtidas pelos algoritmos advêm da mesma distribuição (sem diferença significativa)

Hipótese alternativa: as amostras são diferentes e o transgenético obtém as melhores soluções

Se o p-velor for menor que 0.05, a hipótese nula deve ser rejeitada em favor da hipótese alternativa (transgenético melhor)

Se o p-valor for entre 0.05 e 0.95, não se pode concluir quem foi melhor.

Se o p-valor for maior que 0.95, indica que o memético foi melhor

Aqui o transgenético perdeu em 8 instâncias
ganhou em 239 instâncias

se nao apresentou diferença significativa em 23

Tempo em segundos
